LETTER OF RECOMMENDATION

It gratifies me to give this letter of recommendation to **Mr. Kankanala Pradeep Chowdary**, one of the most extraordinary students in our department who desires to pursue his Master's in your esteemed University. I have known Pradeep for four years and had the opportunity to closely observe his abilities in this domain. I was his course instructor for "Java 2 Platform, Enterprise Edition (J2EE)" both theory and practical sessions. During the supervision of laboratory works related to the programming language J2EE, I have personally noticed how well he possesses a great perception on the basics of computer programming with in-depth knowledge in object-oriented concepts. Pradeep is highly intelligent and has good analytical skills.

My observations during the past few years have shown him to be an enthusiastic and diligent participant coupled with an Engineer's practical approach and an amazing grasping tendency. Pradeep is an attentive student, receptive to new ideas and clear-cut in his presentations. His end semester project on "House price prediction using machine learning algorithms" demonstrated his ability to observe things to the last detail and their effect with precision. His quick grasping of new theories, discernment of concepts and the keen interest in teaming makes him a deserving candidate for the Master's program at your esteemed University.

Putting together all his qualities mentioned above, I can say with utmost confidence that Pradeep will be a promising student and assure you that he will face the challenges in the graduate program due to the dedication he possesses. I am positive that this course would be the right path for him and that he will excel with flying colors. Thus, I have no hesitation in recommending him for admission into your institution for the Master's program.

(J.Albert Mayan)
